

## **Sprint plan**

- Practice Presentation - All
- Print out supporting Images - Nate
- Finish running pipeline on novel data - Tristan
- Code Review with Clients - All

## **Sprint Execution Notes**

### **Client Meeting Notes**

*Symposium: May 21st 4-6pm*

#### **May 20th, 2025 Meeting Notes**

We discussed the next steps they should take as they begin to use the project

#### **May 27th, 2025 Meeting notes**

Code review - Code is well commented/ocumented and organized

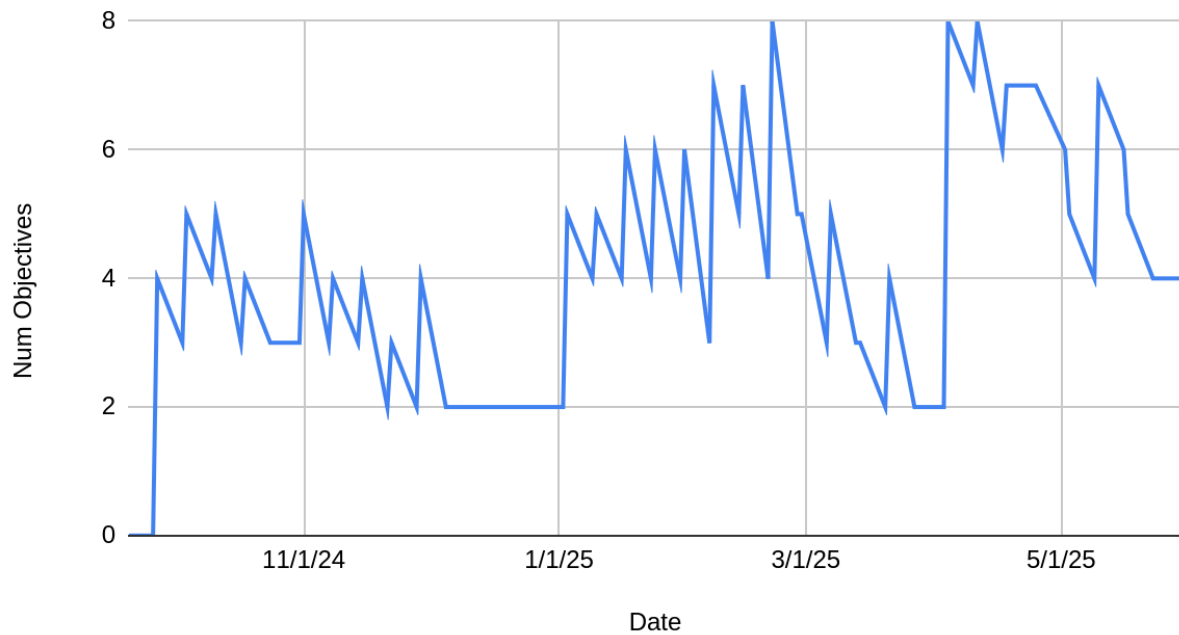

Current Documentation is enough, the main Jupyter notebook has enough documentation to not need a readme.

No need to meet next week, they have access to all the files and everything they need, we will just have to reach out for some final acceptance

## **Sprint Retrospective**

- What went well in the sprint?
  - The presentation
- What didn't go well?
  - Nothing
- What will you do differently next sprint?
  - nothing

## Objectives vs. Time

### Next Sprint

- Handoff to clients - All
- Peer/self/client evaluations - All
- Double check all documentation is done - All
- End of Quarter Project Deliverables - All
